**MEMORANDUM FOR GENERAL HAIG**

**FROM: Tom Latimer**

**SUBJECT: Latest Intelligence on Soviets and Chinese  
Military Developments**

Attached is the most recent CIA report on developments in communist military affairs. It is a desk-level analytical job, not a finished CIA product, but it has several items of interest. It was produced before the latest satellite photography of the Soviet missile sites was available.

25X1

- Page 12 has an article on the possible assignment of the mobile low altitude SA-6 system to a Soviet strategic defense role.
- A comparison of the Institute for Strategic Studies estimate of Soviet forces this year with our own is on pages 17-18.
- A very good and comprehensive outline of the current status of the Soviet submarine force is provided on pages 19-26.
- Finally, on page 29 there is an article on the Soviet development of a new port in Egypt, presumably for use by Soviet naval ships.
